- Unique page layouts
- jQuery enhanced
- Easytabs jQuery tabbed navigation
- Working PHP contact form
- Cross browser support
- Knob free jQuery rounded progress plugin (used as Skills graphs)
- Premium resources:
 - fancyBox2 (19\$ Value) (optional)
- 6 page in one template:
 - Home
 - About
 - Resume
 - Portfolio
 - Contacts (Contact information with Google Map)
 - Feedback (with working php form)
- All HTML, CSS files are well commented

HTML Files

index.html

This is “All-in-one” html file included all template pages using tabs navigation interface.

1. Social networks links

```
<!-- Container -->
<div class="vcard-container">

    <!-- Social buttons column -->
    <div class="social-buttons">
        <a href="place your facebook page link"><div class="facebook"><i class="fa fa-facebook"></i></div></a>
        <a href="place your twitter account link"><div class="twitter"><i class="fa fa-twitter"></i></div></a>
        <a href="place your linkedin page link"><div class="linkedin"><i class="fa fa-linkedin"></i></div></a>
        <a href="place your skype account link"><div class="skype"><i class="fa fa-skype"></i></div></a>
        <a href="place your instagram page link"><div class="instagram"><i class="fa fa-instagram"></i></div></a>
    </div>
    <!-- /Social buttons column -->
```

2. Main Navigation links

```
<!-- Navigation tabs -->
    <ul id="main-nav" class="tabs">
        <li class="about"><a href="#about"><i class="fa fa-user"></i></a></li>
        <li class="resume"><a href="#resume"><i class="fa fa-tasks"></i></a></li>
        <li class="portfolio"><a href="#portfolio"><i class="fa fa-suitcase"></i></a></li>
        <li class="contacts"><a href="#contacts" class="tab-contact"><i class="fa fa-globe"></i></a></li>
        <li class="feedback"><a href="#feedback"><i class="fa fa-comments"></i></a></li>
    </ul>
<!-- /Navigation tabs -->
```

3. Pre-defined color themes setup

There are 14 pre-defined color themes as .css files placed in css/colors/

1. Find in top of index.html this code:

```
<!-- CSS -->
<link rel="stylesheet" href="css/font-awesome.min.css">
<link rel="stylesheet" href="css/jquery.fancybox.css" media="screen">
<link href="css/style.css" rel="stylesheet" media="screen">
```

2. Place the next line with desired color .css, for example:

```
<link rel="stylesheet" href="css/colors/color-green.css" media="screen">
```

3. Skills rounded graphs percentage changing

Gridly template uses Knob jQuery plugin (<http://anthonyterrien.com/knob/>).

You can change size, thickness, colors and percentage of desired graph.

```
<!-- Skills block -->
<div class="grey-content">
  <div><h2>Skills</h2></div>
  <div class="clear dividewhite3"></div>
  <div>
    <div class="one-third">
      <div>
        <input class="knob" data-width="width of graph" data-fgColor="foreground graph color" data-
bgColor="background graph color" data-thickness="thickness of graph" readonly value="percentage">
        <h4><strong>Graphic Designer</strong></h4>
        Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vivamus fringilla libero a nibh sollicitudin
      </div>
    </div>
  </div>
```

CSS Files

All CSS files which is used to style the layout and content are located in css folder:

- font-awesome.min.css (Iconic Font Awesome core CSS file)
- jquery.fancybox.css (Fancybox core CSS file)
- foundation.min.css (Foundation Reveal modal window CSS file)
- style.css (main CSS file, included reset styles)

Javascript Files

All Javascript files are located in js folder. By default theme uses minified version of the all scripts to reduce page loading times and to save your site bandwidth.

custom.js

All Javascript settings & custom scripts.

jquery-1.7.1.min.js,

jQuery is a fast and concise JavaScript Library that simplifies HTML document traversing, event handling, animating, and Ajax interactions for rapid web development. More information can be found at <http://jquery.com/>

jquery.easytabs.js

Plugin for tab navigation. More information at <http://os.alfajango.com/easytabs/>

jquery.fancybox.pack.js

Fancybox is a tool that offers a nice and elegant way to add zooming functionality for images, html content and multi-media on your webpages. More information can be found at <http://fancyapps.com/fancybox/>

jquery.hashchange.min.js

jQuery Hashchange Event is a tool for correct work of Back button in browser with tab navigation. More information can be found at <http://benalman.com/code/projects/jquery-hashchange/docs/files/jquery-ba-hashchange-js.html>

jquery.knob.js

Knob jQuery plugin for building rounded graphs. More information on: <http://anthonyterrien.com/knob/>

jquery.isotope.min.js

Isotope: An exquisite jQuery plugin for magical layouts. More information can be found at <http://isotope.metafizzy.co/index.html>

jquery.validate.min.js

This jQuery plugin makes simple clientside form validation trivial, while offering lots of option for customisation. More information can be found at <http://bassistance.de/jquery-plugins/jquery-plugin-validation/>

foundation.js

Plugin for enabling foundation framework feature (in this case for modal only).

<http://foundation.zurb.com/>

`foundation.reveal.js`

Plugin for easy modal windows.

<http://foundation.zurb.com/docs/components/reveal.html>

`jquery.zflickrfeed.min.js`

Plugin for showing the flicr feed (as the widget example on the Shortcodes page).

<http://www.zazar.net/developers/jquery/zflickrfeed/>

Setting up PHP Contact Form

This template contains a one PHP file (located in php folder) which is required to send a message using the contact form. This is a really accessible and well validated contact form by Joe Pettersson.

Setting up the contact form is really simple. All you need to do is to open php/contact.php file and replace `$emailTo` value with your own one.

More information can be found at <http://www.joepettersson.com/accessible-php-and-jquery-contact-form/>

Setting up Google maps

Here's what you need to do:

1. Open "custom.js" file (located in js folder)
2. Find the following line:
`var $latlng = new google.maps.LatLng(34.021453,-118.785027),`
3. Here you need to change the latitude and longitude values (values in parentheses).

These values you can find in the Google maps:

1. Open the Google maps
2. Find your area
3. Right click on the map and choose "That's here?" and you will see these values in the box above.

Sources and Credits

Fonts used:

Open Sans, [Font Awesome](#) (iconic font)

Images & Pictures:

Some pictures are included only in preview of Gridly template and aren't included in the downloadable archive due to copyrights restrictions of pictures' holder.
